DETAILED ACTION

RESPONSE TO AMENDMENT

1. This Office action is in response to Applicant's amendment filed on 05/09/2003.
2. Claims 20, 41-42 are canceled, and claims 1-19, 21-40 are pending.

ALLOWABLE SUBJECT MATTER

3. Claims 1-19 and 21-24 are allowed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 25-42 are rejected under 35 U.S.C. 102 (b) as being patentable by Pickholtz (U.S. Pat. No. 4,593,353).**

As per claims 25-40, Pickholtz discloses a method/apparatus for limiting program execution to only an authorized data processing system, a proprietary program, together with first and second

authorization codes, is stored on a magnetic disc or other storage medium(which is readable as Applicant's claimed invention wherein it is stated that a secure data storage medium), comprising: a digital storage medium for storing digital data (see., abstract, col 2, lines 26-42, specifically wherein it is stated that magnetic disc or other storage); and an identification system module corresponding to the digital storage medium, the identification system module containing an authorization code describing which media players are authorized to read digital data from the digital storage medium (see., abstract, col 2, lines 26-42, col 3, lines 1-36, specifically wherein it is stated that a hardware module containing a pseudorandom number generator unique to the authorized system receives the first authorization code as a key, and the step of describing which media players are authorized is interpreted as wherein said if there is a favorable comparison, an execute enable signal is generated to enable the software to be executed in the system or in the media players).

REMARKS

6. In response to Applicant's arguments, Applicant argues that the prior art of record taken alone or in combination fails to disclose: " identification system module containing an authorization code describing which media players are authorized to read digital data from the digital storage medium". As indicated above, Pickholtz discloses this limitations in the abstract, col 2, lines 26-42, col 3, lines 1-36, specifically wherein it is stated that a hardware module containing a pseudorandom number generator unique to the authorized system receives the first authorization code as a key, and

the step of describing which media players are authorized is interpreted as wherein said if there is a favorable comparison, an execute enable signal is generated to enable the software to be executed in the system or in the media players.

Conclusion

7. The prior art made of record and relied upon is considered to applicant's disclosure.
